Hongsone, March 29th, 1884.

The work of the Smuggling Commission is to be attended with some practical result Those who have followed the history of the Blockade question with interest-and who has not?-must have read with satisfaction the dispatch of the Secretary of State i which he approves of the suggestions of the Commission. These were :- (1) That the Chinese Government should be called upon to verify the status of the so-called revenue cruisers, which, carrying an Imperial flag, anchor in this harbour and claim to be regarded as vessels of war, or to be commissioned by the Chinese Government-designations to which it was shown by the evidence before the Commission many of them were not entitled and that the Hong. kong Government should take into consideration the terms on which vessels engaged in Thursday. the preventive service of China should be allowed to make use of the waters of the colony; and (2) That the gathering together of unauthorised armed bands on British territory, for any purpose whatever, should be prohibited, and that the provisions of be made applicable to the entire area of the colony. With reference to the latter recommendation it is explained in the report that the magistrates have recently decided went into the Kowleon and Aberdeen docks the law in question applies only to Victoria, respectively yesterday. To-day, the British The second recommendation Lord DERBY says can be at once approved, and with reference to the first, Sir HARRY PARKES has been instructed to urge the Chinese Government to comply with the wishes of the Hongkong Government in the sense of the report, and to verify the status of such of the cruisers as belong to the Imperial Navy or Officials. In the meantime Sir Gronge Bowen is to communicate—with—the Consul at Canton, with the view of verifying such vessels as are under the Provincial Government or Officials. That it is desirable to! prevent the gathering together of unauthorised armed bands on British territory Theatre Royal was largely attended by the is a proposition that admits of no dispute. | youth of the colony, and passed off very suc-While the colony is not called upon actively cossfully. to aid the Chinese Government in the collection of its revenue, it is none the less in-

cesible to over-estimate the importance of the suggestion which has been made and is to be acted unon. It has been practically decided that the Chinese are within their international rights in maintaining their Customs stations and cruisers at the throat gates of the colony. It is therefore almost idle now to agitate for their total removal. What is of immediate and substantial importance is to se- | nesr, who had to be carried to the Central Stacure that the native trade passing to lion in ambulances and from theses to the bosand from the colony shall be subject The madman was arrested by the police on the only to the authorised espionage of duly spot. accredited officers of the Chinese Government, and shall not be preyed upon by a horde of extertioners who, by the payment of a fee in a despatch to the Viceroy from Admiral Ng in to the officials in charge, secure to themselves the supposed right of levying various . and sundry exactions of an arbitrary and untabulated nature. Where junks are plying in competition with vessels coming under the Foreign Inspectorate of Customs. the native Customs arrange their tariff on a scale to encourage the carriage of goods by | natives is one to the effect that a body of French the route that secures to them the duty, especially as regards opium, but where this thousand of them slain, very few escaping to is not the case, and junks are proceeding tell the tale. to out-of-the-way ports which would not be reached by the goods borne in Thursday night, a conflict occurring between foreign vessels, there is abundant evidence been used to cover acts of piracy. The Commissioners in their report refer to cortain letters of Mr. Hewlerr, H.B.M. Consul at Canton, which have not been publish. the five launches Lite'ap, Tsinghoi, Fits'ap,

calls for no comment. With reference to the

Canton admitted they were engaged in legying the coast defence tax, which was farmed out to a monopolist, but said he pulation with which the colony is troubled. could not reprimend the commanders as they were not in the Government service. These vessels were all accused of preying old effender. Some of the others were claimed and thirty-three at the class. Four boys left during structure. This mass is then turned out of the unlawfully upon the junk trade and seizing beats in British waters, and the Commissioners record their opinion that there is have been rendering even our busiest thoroughgood reason to believe levies are made which are unknown to and are unauthorised by hard labour by a full bouch, and Mr. Wodelionse the Chinese Government. They say :- I has taken till Monday to consider what course "Cruisers are licensed and sub-licensed by very questionable authority, and are guilty of irregular and quasi-piratical acts. It is in evidence that the crews of these vessels | Massrs, Cutler, Palmer & Co. the following intiare not unaccustomed to convert to their | mation :- "We are happy to inform you that the own use, without any official proceedings for condemnation, goods which they have seized on allegation of being smuggled or

contraband." Such a state of things must necessarily operate very unjustly and injuriously on the trade of the colony carried [28] in native craft. The verification of the status of the craisers, if duly carried would go far to witigate the and would therefore be a distinct advantage. But it will not, we are per-Los and Perrins on a red suaded, be attained without considerabl label. Sold wholesale by the trouble, and even if the Chinese Government formally agree to the proposals to be placed before them by Her Majesty's Minister, the abuse will crop up again on the smallest re- | and a sweeter wine for Continental use. laxation of vigilance on the part of the Hong. kong Government. The system of farming

together with all its attendant abuses. whole fiscal system of the country in fact a gigantic system of squeezes. At Ngthere is a string of some half-dozen Customs Stations. If you speak to your boatman about them he will tell you that one is a proper Customs Station and that all the others are aqueeze stations. While officials are dependent for their emoluments upon the squeezer ther can make it is clear that extertion will be carried on. This being the system recognised throughout the empire, it is not likely the officials concerned will be very wiil ing to make any exception in the case of the Customs station and cruisers with which the trade of Hongkong is more particularly concorned. The Hoppo himself farms his encoved for his rendering of "Ob, Rest in the office from the Government and sublets pri vileges to his hangers on, who again sublet until we find vessels levying dues and flying the Imperial flag which are actually disowned by the Chinese Government. That Sir HARRY PARKES will obtain in name what he is instructed to ask for we have little doubt, but the Hongkong Government will have to be eyer on the alert to see that it is not put off

A terrible case of cutting and wounding took place yesterday afternoon towards nightfall among the Chirchews at West Point. It apneared that a madman arrived here on Thursday from one of the Coast Ports and put up among his countrymen at the Nam Pak Hong or Tanghing Lane. Yesterday afternoon, in a state of frenzy, be caught hold of a knife and ran amuck, dangerously wounding some seven or eight Chi-

To demonstrate the mendacity of the statement which the Chinese officer was said to be carrying Hainan, namely, that Bacoinh and Sontay were retaken by the Chinese on the 15th and 12th March respectively, it is only necessary to mention that Mr. Colombons left Bacainh on the 15th, on which date it was in the unopposed occupation of the French. The rumour has been taken up with avidity by the Chine e, who declare that all the telegrams which have lately appeared refer to former events. Amongst the many absurd statements circulating amongst the troops were decayed into a wooded defile "where they were attacked in front and rear and about a

There was quite a riot in Tank Laue on the chair coolies who largely colonise that quarter and the police. A lokung on duty there to show the most disgraceful extortion is asked a coolie, whom he met, for his pass, it being 10.—Volunteers' Rece (prizes by Officers E.A. practised, and, in fact, the Chinese flag has lafter hours, and the man not being possessed of 11.—Skid and Handepike Race (100 yards) ... 4. one, he arrested him. The coolie called for help, and a number of menfrom the house helived in ran out to his assistance, and resoued him. Another lokang came to the assistance of the first, but he 15.—Obstacle Race (open to the Garrison) was knocked down and his sword-bayonet snapped 16.—100 Yards Raco (open to scamen and marines of H. M. Fleet) in two. A number of other constables were atad, but in which, it is said, that gentleman tracted to the spot by the whistles of the lokange, informed the Hongkong Government that) and twenty-six of the rioters were seized after a melée. These men were brought up before Mr. Wise at the Police Court yesterday, and were Ts'apsai, and Lingching were disowned by fined 85 each. Another batch of men, somewhat the Chinese Government, although flying smaller, was brought up from the same quarter the Imperial flag and using the man-of-war, having set upon a lokang in a similar way for aranchorage at Hongkong. The Viceroy at out a pass.

The earning snatcher | early both for the cake of health and to enable Mr. was sentenced to two years' imprisonment with he shall follow with regard to the others.

By the last English mail, Mexara, Arnhold gold medal has been awarded by the jurous of the Calcutta Exhibition to Wachter & Co. for the excellence of this wine [the Royal Charter Champagne]. The champagne is no doubt of the finest nality; it has undergone a very severe tasting test by experts in comparison with all the best known brands, all marks and labels being obliterated, and the wine, judged upon its merits alone, came outfirst." Among other testimonials to the excellence of the "Royal Charter," the following, referring to the Queen's last Ball in London, from Truth, invites attention :- "The supper is always most admirable at the Palace and the wines unexceptionable, notably the dry champagne. In this respect the Queen sets an example which might very well be followed at other fashionable entertainments, at most which the guests are ruthlessly poisoned with the cheapest abominations that can be bought. Mesera. Wachter & Co. prepare two kinds of champarne, one extra dry to suit the English taste

that institution on Thursday ovening, and from the appearance of the house there is reason to hope that some material benefit will result. Thursday's concert was of a different character! from the preceding ones, the music being all sacred. The vocalists were the members of the choir of St. John's Cat edral, with ladv and gentleman amateurs. The chair was occupied by the Right Rev. Bishop Burdon. The choir sang exceedingly well, but the voices did not, of course, sound to such advantage in that building, accompanied by a piano, as in the lofty and spacious Cathedral, with their efforts assisted by the swelling strains of the organ The trebles seemed rathe: overmatched by the strength of the tenors and basses, the reason being the difficulty in a curing a good number of boy's voices. The pionoforte selections were rendered with much skill, and were well received. Five ludies gave the part songs in a manner that seemed the appleuse of the audieuse; the duet "Nazareth" was well song by two of these ladies; and other two gave the conga "No night there," and "The Better Land with much success. Fritz Lammert was loudly Lord," and he gave in response "Thou art fairer than the Children of Men." The gentleman who saug the recitative. "Ye people rend," and the sir "If with all your hearts," is always a spacessful performer, and his rendering of these difficult and high class selections was so excellent that the audience would not be denied an encore. Appended is the programme: -

Piano Duot... "Gloria in Excelsia" (12th Mass) Mozart. "Ye shall dwell in the Land" Stainer "The Children's Home"...... Cower. "No Night There" Donne.
"Oh Rest in the Lord" Mendelssohn (from the Elijah) (encored) PART II. " Hallelujah to the Father" Mount of Olives

"The Better Land" Recitative "Ye people rend" { Mendelssohn "If with all your hearts" Part Song ... " Protect us through the coming night'

THE HONGKONG PUBLIC SCHOOL

The following is the report for 1883:-The Committee of the Hongkong Public School are happy to be able to report a considerable advance during the past year, both in the number of pupils and in the general efficiency of the institution. There were twenty-three pupils at the beginning of the year. the year (for England), and fourteen were admitted The average attendance for the whole year was 2 an increase of 4 on that of the provious year. house for the Master and Mistress. This was noces and Mrs. Hambling to receive more boarders from the out-ports. This causes a serious addition to the

expanditure, but it is believed that in time it will at-Karberg & Co., the local agents for Wachter's | carlier than they would otherwise have done in order "Royal Charter" champa no. received from to study Chinese elsewhere. As many of those attion in the colony, a knowledge of Chinese is in some cases necessary and in all will be most useful. The school is no longer under Government Inspection. Large numbers of pupils and comparatively

small expenditure are conditions under which Government Inspection would prove a real help. This school as the bottom of the upper pan, to which cannot expect large numbers of pupils and yet the expenses are very heavy. The Grant-in aid therefore was so inadequate that it did not seem worth while to bind down the head master to the arrangement of hours and lessons required by the Govern ment as a condition of competing for it. At the same. time the teaching officiency of the school has been maintained by the examinations held in December Messrs. Johnings, Ost, and Lee.
The Rev. Mr. Johnings says:—
"I examined the lst and 2nd classes at the end-

marked improvement at the second examination. tinned, more advanced text-books should be used than the small primers now in use, at any rate b Class I. Some of the papers were exceedingly, good and spoilt only (in some cases) by poor composition and spalling, which I think ought to have more at tention bestowed upon them.
"The Algebra, which I also looked over, had evidmitly been carefully taught. The few who are study

are not yet beyond the first principles; but they are being well-grounded for more advanced studies." The Rev. Mr. Oat reports: Grammar, and Physiology, and was, on the whole, highly pleased with the result of the examination. The papers of some of the sonior boys were excellent, shewing that the subjects had been well and earefull taught. One boy-Shepherd-sent in answers c

ing that subject have not long ago taken it up. and

The spelling and composition were weak in two head master, and will, I feel confident, receive his ment fund in connection with the school, which gives prospect of permanency to the institution, and also nominal matter. At present it will be seen there only a working balance of \$113.66, and donations are

again carnestly invited for the current year. The Committee would again remind their friend and subscribers that the school is on the same footing emported partly by donations and partly by fees. one-half of the actual working expenses. Higher see would be prohibitive, and would drive manyperhaps most of the parents to send their children o schools unsuitable to them, which in the opinion of many here ought not to be allowed in a community

VERMILLION—IIS MANUFACTURE IN CHINA.

The Chinaman has no knowledge whatever chemistry, and of the principles -of natural philosophy and station generally - his notious are of the most rudimentary and primitive description. How, then, in the face of these obvious disadvantages have the Chinese contrived to place themselves in the front rank amongst nations in the matter of certain obemical manufactures, one of the most important of which s the subject of this article, -Vermillion! In our last article we have seen with what. indennity and pertinacity in carrying out his ends the Chinaman has succeeded in making perhaps the most delicate and perfect iron castings in the world. He has succeeded in that instance not by any deep researches into the hidden mysteries of Nature, by no process of thought involving be inquiry into the " reason why;" to this the Chinaman is averse, the whole tendency of his education, such as it is, tends to make him satisfied with observing effects: it is sufficient to him to know that things are so. without going into troublesome or elaborate intestifies. We will now enter a vermillion

and packing this coatly and beautiful pigment for the market. tion on entering the yard attached to the works The Saigonnais speaks in the highest terms of three reverses, the competition on Thursday will probably be large piles or stacks of charcoal. erates or baskets of broken crockery were, and bottom of the vessel, that is, the portion which a very narrow one, the difference being only eight | numerous rusty old iron pans of somewhat simi. | remained longest suspended in the liquid, will be The Lynch Family Bellringers will give points, which, considering there were three lar shape to the rice pans previously described. ranges with seven shots each, was a very close but considerably thicker and beavier. The process of which is of four inches smaller diameter than | cess, or how it acts we cannot quite clearly see; | we are more advantageously situated than they | large concession, which adjoins fully one mile of those described, and also in all other respects the glue is added as described above merely to see in Sumatra; we can build drying sheds for his rich mine, and arranging mutual concessions proportionally less except the runner, which is of the same size, a skilled workman proceeds to weigh out 17 libs, of sulphur; this he places in therefore be separated in their order of strati- alongside rivers. As regards sugar—that is the those matters speak well for Their eng, which is the pan and adds about half the contents of a floation. The actual composition of vermillion next best crop to give quick returns. We have fast approaching Pennny in size, all the buildings bottle of quick-silver; the pan with its contents is then put upon a small earthen brazier or portable farmace, the fael used in which is charcoal. When the sulphur'ls sufficiently melted the work- is probably volatilized and lost in the process of a good profit. But we shall walt till it has grown works at Fort Weld-railway line and public man, taking an iron spatule or stirrer, rapidly

stirs up the quicksilver with the sulphur and

gradually adds the remaining contents of the

together meanwhile until the mercury has

wholly disappeared, or "been killed," as the people having like the Chinese no acquaintance on those rivers where we found the soil better. Chinese put it. When this takes place the nan is removed from the fire, a small quantity of pan into an iron morter, and then broken up into a coarse powder; this forms a charge for one of esting to be seen in any part of the world. Another sign of advance is the hiring of a separate the large pans proviously described, and when sufficient material has been prepared to charge all the pans in one furnace chamber the sublimation is proceeded with as follows. All tract boys from a distance and so increase both the pans having received their quantum usefulness and the income of the school.

Chinese has been added to the subjects taught. It of crude vermillion, this is covered with a was found that the want of it might lead hoys to leave number of erockery or percelain were plates of tough, strong manufacture, each about eight tending the school look forward to obtaining occupa- inches in diameter; some of these plates, however, are broken up and in a more or less fragmentary condition. When these plates have been piled up into a dome-shaped heap of the same shape they should extend, the whole is covered with one of the smaller pans previously described Now, it will be remembered that the smaller pan was of four inches less diameter than the larger one; there will consequently be a directar space of two inches all round between the circumference of each pan. Consequently the rim of the 1883 in the elements of geology and physical geogra-upper or covering pan will be about two inches phy, as I also did at the end of 1882, and have found lower than the rim of the lower pan; there will also upper or covering pan will be about two inches besomefour inches appea horizontally between the rim of the large lower pan and that portion of man, A Chinese foreman gave similar evithe smaller non which is at the same height as the rim of the larger one. This space is carefally filled with a clay lating into which some holes, generally about four in number, are pierced extending down to the rim of the smaller pan or cover; this is done in order to allow the heated air and other matters to escape. All charged and covered, the fires are lighted; the the case. flames from the chargost should-occasionally play several feet above the mouths of the auch a high order in each subject that I make special farnaces, the door of the chamber is kept closed except when it is opened for a moment in order or three instances. This has been pointed out to the to enable the workmen to replenish the fires, which must be kept up at a fieres heat for The statement of accounts appended to this report of theen bours. Daring the process, a blue so far satisfactory that it shows a growing endow. | Involvent flame is seen to play above each of the four holes which are pierced through the clay of making the annual appeal for assistance a very luting of the paus, so it is evident that a considerable quantity of either one or probably both the ingredients is wasted. After eighteen hours the fires are allowed to go out and the as ordinary middle class Public Schools at home, | contents of the paus cool down. When this is accomplished the greater portion of the vermillion will be found adhering to the lower surface of the broken up porcelain plates with which the crude product was covered. The vermillion is then carefully removed from the porcelsin by

means of chisels and is now ready for the clutriating mills. Another portion of vermillion of not so good quality is that found adhering to the apper iron pan and that obtained by washing the clay luting in a cradie, as diggers wash dirt for i gold; this together with the wipings and scrapings enerally is mixed up with alum and glue water into cakes, and, after drying on a brick surface beated beneath by means of wood or chargoal, is powdered up on a mortar, and resublimed when enflicient quantity has accumulated. The vermillion which was removed from the porcelain plates is of a blood red colour and rystallina structure. This is then powdered up in a mortar and removed to the levigating mills; J. Daeth, Ching Lieu Saen and Wang these are the ordinary little horizontal stone East to grind rice and other grain into floor or pulp as the case may be. Each stone is about two and a half feet in diameter, the lower stone is atationary, the upper is turned by a direct acting

piece of wood having a hole in it in which works

a wooden per affixed to the upper stone, which is made to revolve by a backward and forward movement of the piece of wood, or handle, some three or four feet long, previously mentioned, One man turns each mill. The upper stone has s small bole in it near its centre, down which the vestigations into those changeless laws of Nature, ful of the powdered vermillion which he washes company stand as follows:nto which his philosophy teaches him that as down into the mill with water; as he turns the cavalry-recommissance have had a skirmish with he caunot alter or control research is fruitless; but mill, the workman keeps continually ladling little spoonfuls of water down the aperture or hole in that he has in his own small, in enious, patient | the upper stone; the ground and thus elutriated way observed effects to very good purpose, the vermillion as it escapes from between the stones unrivalled excellence of some of his manufactures is washed down by the water into a vessel placed becasth to receive it. When work is suspended for the evening, the ground vermillion is care manufactory and watch the process from the fully stirred up with a solution of glue and first stage of mixing its two ingredients-mer- lalum in water, in the proportion of about an cury and sulphur-to the final process of weighing ounce of each to the gallon. The gine has been made to mix with the water by previously heat. ing it with a small quantity of water: the earther The first objects to attract the visitor's attenacttle. In the following morning the mixture of lue and alom is poured off the vermillion, and the upper portion of the cake of vermillion at the found to be in a much finer state of sub-divi sion than the lower portion, which requires to bed again elutriated as on the previous day; this separation of the more finely divided vermillion cess, for which we should give the Chinaman every credit. The process of grinding, elatriation. and separation of the coarsely ground from the colour. As a final process the damp cake of finely ground vermillion is stirred up with closu water, and allowed to settle down until the next on the roof of the promises. When quite dried the thom very equal' cakes of now full coloured pigment are carefully powdered and sifted by means of square muslinand this completes the view of the works. The licttomed nieves, contained in a covered box some from pane in which the vermillion is sublimed two feet high by two and a ball wide, in which ! the sieves, which slide ou a frame-work inside Hongkong or Shanghai as ord red by the agent.

the box, are jerked backwards and forwards by Mr. J. Daeth and Mr. Wing T.o Chin have been appointed to illl the ranneles in the Board of Directors semi-spherical in shape; all are of the same size | means of a handle on the outside of the box of vermillion is removed to the packing house, where may be seen rows of workmen, men and boys, seated before a series of tables. Between every every pan in order to enable the workman the scales, which he helds in his left hand, and as have the report for the first year before you, and need to secure it by Captain Ah Quee and wealmore readily to handle the pan when stirring up the workmen on either side place before him the I suppose you have made yourselves acquainted the Europeans. Also, another block parchased little pieces of paper in which the vermillion is with its contents. There is no necessity for me privately adjoining Thompsing and fronting the to be wrapped up, he weighs into each paper one to road it, and we will therefore take it as read, railway; as also extraordinary water rights and and address of the manufactory in which the should decide upon what should be done. article has been made, and the quantity and October we decided to begin by planting tobacco.

quality of vermillion contained in the packet. The reason we chose tobacco was that it gives The rapidity and definess of the Chinese its return within a year's time, while cocce, with proportionate rapidity. The mixture of in the interest of the shareholders to wait so to assist in clarifying or purifying the water by A fair crop in Sumatra means a profit of causing it to deposit its sediment, but seems to forty or sixty per cent., and I think we favour separation of the finely elutriated ver. about half the cost, and our ground is more as a neighbours bolding such valuable property million by holding it longer in suspension than | cessible than the ground in Sumstra, as we have should make, in carrying au extensive drainave the coarser particles, which sink first, and may no land journeys to perform; all our land being as well as mining in adjoining property. All is one hundred parts of mercury to sixteen of planted sugar; but it takes from ten months to are being made of brick, and covered with tiles sulphur, when both these ingredients are in a a year before it becomes ripe, From what ex. of beautiful design. We hope Sir Hugh Low's perfectly pure state; the excess of one pound perts have said, we have reson to believe that we successor will maintain the wise action of his and one-third of sulphur added by the Chinese shall get about 24 tons an acre, which would give predecessor the Resident and push on the public sublimation, or as the sulphur rised is generally and then get a proper report on it. You will see roads. His movements will be watched with not quite pure, a part may go for foreign matter by the report that the selections of land are fixed. | great suriety, and by none more than ourselves.

THE CHINESE SABAH LAND $COMP \land NY.$

The annual meeting of the shareholders of this Company was held at the office of Messrs. Myburgh and Dowdall, Shanghai, on the 20th inst. Mr. E. Major (Chairman) presided, and there were also present Messrs. John Morris, Tao j thin (Directors), J. L. Hammond, E. Laluana, J. M. Young, Pinckyoss, and several mills, used by Chinese and other natives of the Chinese shareholders, representing altogether over one thousand shares.

The following is the report:-The directors submit to the shareholders a statement of occurate for the opening year ending the 31st Dec., 1863-In view of the unproved capabilities for agriculture of British North Bomee the directors deemed it expedient to eet with caution at first starting. The operations of the company from April to October were, therefore, confined to experimental planting of sugar cane, tobacco, Liberian coffee, cocon, and Manila hemp, and also to the final selec-tions and surveys of the company's land.

The frontage land of twelve rivers running into the Bay of Sandakan was originally secured as a basis for selection, but a camful comparison of the soils and lay of land has workman from time to time pours a little spoon- 'ed to some med fication. The final selections of the

ho Sabooga River 4,000 acres; Survey comp. Suanlamber Survey in progress. Seekong Segations 10,000 8,000 , Survey to follow. The estates opened are—

On which Liberian coffee, cocoa, Manile hemp, &c., have been planted. This estate, besides having two water abreaches, is within two hours walking distance of Sandikan, and is being baid out with the object of subletting in arrivals yesterday, one from France and the mall farms to Chinese pepper planters.

Where the trial planting of sugar cane is being made, nd where 100 acres for t bacco are being cleared. An experimental planting of a few acros of tobseco was commenced, but owing to the mismauagement on the part of the planter (who is no longer in the company's employ)

the transplanting was effected too late in the season to be In March last the directors engaged the services of Mr. J. Morrison, formerly of the Hongkong & Shanghal pending departure will close all grants, Banking Corporation, to be the company's agent in San- which are admitted by all who kind In October and November last the chairman, Mr. Ernest

Lajor, made a second visit to North Borneo, and, in connuction with the agent, decided upon a plan of action for the forthcoming year on a scale sufficiently large to be remunerative, as follows: lat.-To plant 100 acres tobacco;

2nd .- To develop the timber trade; 3ri.-To extend the Sunnismber sugar cane sufficiently

f 2/400 acres, if doesned advisable, in June and July next; 4. To continue extending the Sabooga estate. The services of Mr. Gibson, an experienced tobacco planter from Deli, Sumatra, have been engaged, and he has recently contracted with and despatched coolies from ingapore to Sandakan. He reports on the soil of the woil I should call it very fair; and, with the seasons which we get there, I should look for good results. I have com-

The services, also, of Mr. MacLean, who has had large experience in the timber trade, have been engaged to superintend wood-felling and shipping, and he is now busily employed with a gang of cholies. Two sailing ships have been departed for sundakan to load timber for for concessions of land at Fort Wold, for the aused by the retirement of Mr. C. Lucas and the absence

f Mr. Tsau Tso Chun from Shanghai. The directors resign office in accordance with the Deed of Settlement, and offer themselves for re-election. (Signed) Baxust Majon, Chairman.

luting during the aublimation process. For a thought we would increase the amount of land Penang Gazette.

with even the first rullments of chemistry, the I think we have obtained the first choice of land proportion of ingredients taken-one hundred in the neighbourhood of Sandakan, and since we pounds to seventeen and one-third pounds -shows got our land. Sandakan has become the capital, water is added, and rapidly stirred up with the wonderfully securate powers of observation and I have no deabt that the value of our purcontents of the par, which have now assumed a a knowledge of combining proportions only to phases, which cannot be repeated by any dark blood fed appearance, and semi-crystalline be gained by much experience and a long ex. purchaser of land there, will be proved in tended series of careful observations highly thefuture. We have also, as you will see, decided oreditable to the manufacturers. The entire to go in for cutting wood. Before we commendprocess is one of the most ingenious and inter- | ed that business we had to look round for an experienced foreigner who knew the kidds of wood to get, and what markets to soud to." We have had specimens of the wood sent up to Shanghal, and they have been pronounced to be very valuable wonds, especially for piles, lasting under water perhaps for hundreds of years. There is a prospect of making a fair amount of money in this way, although of course it depends on the state of the market. In the accounts there is an item of Tls. 19,255 due by Tsan Tso Ohnn which requires to be explained. moned by Tang Kun Kin, machine man, and one of our directors, and he applied for one thousand shares and paid the bargain money. Tls. saulting them at the Taitam Works on the 2.51 each share as per oustone. We had great difficulty in getting the maney from him; we wrote to him several official letters, and he paid another Tis. 2.50 per share. Eventually he fully paid up a hundred shares, but we could not They resented this and the second defendant get any more from him. Then the market went down, and we could not very well sell the shares, and we were rather got. We have got something like Tls. 5,000 from him for the 900 shares which he has not fully paid up, and it will be a question whether the directors shall give him a stice that this will be forfeited. In that case the number of shares in the Company will be re-William Wall, foreman at the works, deposed to duced, and we shall be to a certain extent gainers by about Tis. 5,000. The be will complainants and the other defendant beating the be seen that there are a back and fifty shares unalletted. That was awing to an accident. We understood that one of our Chinese directors wanted two hundred shares. He was sick at the time, and when he got well we found he only wanted fifty shares; That reduces the available capital of the Company; but I do not think there is any help for it. The present policy of the Directors is to keep the working of the Company, if possible, within the limits of its capital. We hope to beable to show the chareholders some planting which will make a fair profit, sufficient even to divide before we make any oall. That is all I have to

say about the report. If any gentleman has any remarks about it, we shall be glad to hear them, or to answer any questions. The report and accounts were adapted. Mr. LALGACA proposed -That the directors to serve until the next annual meeting be Messra. Ernest Major, Ching Lieu Saen, Yan Chinn

Mr. Young seconded the motion, and it was carried unanimously. The meeting terminated with a vete of thanks to the Chairman, moved by Mr. LALCACA.

KOREA.

Jenchuan, 26th February There are many signs of improvement in this hitherto dull place, and our drooping spirits are beginning to revive a little. The Japanese settlement is growing daily, and within the next three months the space allotted to them will be all built over. The Chinese will commence working out their future settlement as soon as the winter season is past. Messrs. Jardine. Matheson & Co.'s mining speculation seems feited, and \$1 of the fine was given to the likely to be a success, for their engineer has struck a rich bed of lead and silver. I am informed that they intend to build smelting works here, and hope to have them in full working or-

der before the end of this year. A glass manufactory is to be erected here this spring, and I bear that all the shares of the concern have been bought up in Shanghai. We are expecting a good number of European visitors over from China shortly to see what are the prospects of trade. Japanese and Chinese are continually arriving, but not quite the kind we want at present. They all seem bunt on shopkeeping and bartefing, but we need good workmen and boatmen more than traders.

The Nanzing brought on her last trip 2,300 packages of cargo, chiefly building material and piece goods. The export trade is very small yet, but it is increasing. There is a large firm of Korean morphants starting business here, and I am, informed that all the partners are Roman Catholic converts.—Star in the East correspon-

TIN MINING IN PERAK.

"Still they come."—We learn from our Larut correspondent that applications are being made protectorate, principally near the Thaipeng

In addition to the gentleman announced as fresh arrivals, we have now Mr. Harrison, of Hongkong and Borneo, representing unlimited wealth and ower to invest on Tin lands, only second in infigence, we hear, to the Prince of Concessionists, Mr. Drummond, Two other other from Shanghai, the former in hope to rival his fortunate countryman De la Croix; the other, capitalists of our looky neighbours and shareholders in Mr. Drum woud's con-

by petitions for any land, or quantity the Resident likes to give, principally from Australia An impression exists that Sir That Low's on the subject, to have been exists. able to Europeans, and unfiles a Chinese pioneers, who have, at exerment allers brought the Straits Tin fields to be seemed the best ever found and of unlimited extent.

Other gentlemen are pouring in, appealing

We hear that a Bank is about to be established in Theipeng, which is a most argent necessity. afford a nursery capable of transplanting to the extent | It will pay well, as notes are preferable to dollars, the weight and disputes affecting the latter being a perfect nuisance.

The Melhourne Company, under Mr. Turner's management, are proceeding slewly and have lost their grand concession of 512 scres, through sheer neglect, or by some other quexplainable cause, also block No. 121 of some 30 acres right in the heart of the best mines of the district. Had the Shanghai people had that land, several

erection of smelting works on a large scale, and that the proprietors will become purchasors of ore all over Larut to smelt in addition to their own produce; also that Mr. throve, of New South Wales Tin Mines has soured the long envied "McIntyre block," for which 25 per cent. was offered of the gross produce for leave to The CHAIRMAN said - Well, gentlemon, you mine, and influence of every description has been tors and ore dressing machinery.

The Perak Tin Mining Company have completed the erection of their large engine and boiler, also the winding goar, and poppit heads, The want of timber has been great drawback to this Company; but they are now ready to sink their main shaft, and at once commence blocking out the rich and extensive view of wash dirt know to be equal to the best of Captain Ah Quee's land adjoining.

Captain Ah Quee, who is said to be the greatest producer of Tin known, is pushing his business by his own method, as much laughed at by-European inspectors, with fully 7,000 men.

contained in the sulphur; the balance being I went down to Sandakan, and some sites were . Mr. Swettenham will have an opportunity of probably the raison d'itre of the bine lambent obesen for selection; but we found that one or making a great name for himself if he perseveres bottle of quicksilver, stirring the two ingredients flame seen playing over the apertures in the two were rather too sandy to work well, and we in Mr. Low's work and has abilities to do so .-

EXTRACTS. WINTER.

Now round the rivalet's eastle walls Resound no more the rummer's praises; But scarce heard through its frezen walls Runs melody in search places;

For, though the wood runs deep with snow Which wells from us the mosses' slumbers. The stream, with soft, unceasing flow. Goes gliding down in golden numbers.

What language speaks the beauteous stream, With murmure under its green apais. Unconscious voicings of its drama

And music of its gentle lapses ! Is this but gravity which sings? Or blithe joy in a sense of being, Or knowledge of more wondrous things And miracles beyond our seeing ! LEARNED WOMEN.

The ordinary woman of the last generation

upon her ser in the way of education and

public profession, would certainly have been excessively shocked; and the ordinary man, on which her monogram-appeared in steel rooms in the Lee House, on Camp Street would certainly have agreed with her. Familiarity breeds indifference to accompli- which the device of thistles was again ap- they ejected all the other members of th shed facts, but there are, no doubt, still a parent in delicate hand-painting. Silver troupe, looked the door of their room, and great number of men and women who cannot thistles were worn in her dark hair, and without seconds, judges, timers, or anybod make up their minds to accept the new order bunches of the pugnacious plant, gone to else, went atit. For at least an hour the strug of things as altogether nice and natural. In seed, fastened back the same folds of her gle, which must have been a terrific on the days that knew nothing of Girton and dress, which was of silver-grey tulle over Newnham, when girl graduates scarcely ex- silver satin. isted even in the dreams of poets, and when the idea of a female doctor in actual practice was looked upon as an impropriety and an impossibility, our grandfathers and grand. They were not all prejudice some patient in whom it is declared the pre- De la Pommerais' co-operation. "You Cit and exaggeration; and the abuses which have sence of disease proves the absence know," he said, " that one of the most inter- C. sprung up side by side with the advantages of the Lord. The process is of the exting questions of physiology is as to whesome of the prognostications of sceptical back in contact with the corresponding por- sensibility survives in the brain of a man men. That life is a trifle rougher with us tion of the patient's person, and for the after the fall of the head." At this point since the learned woman has been more moderate price of a dollar an hour allows the condemned man looked somewhat startabroad, that female cleverness has been able the supposed Divine influence to filter from | led; but professional instincts at once resumed their sway, and the two physicians culmly discussed and arranged the details of an experiment for the next morning. " When ! Until the South African mines were dis- the knife falls," said Velpeau, " I shall be standing at your side, and your head will at ficed in payment for the new utility, since sands and gravels, different from the mineral once pass from the executioner's hands into mine. I will then cry distinctly into your women guardians, but women doctors and Griqualand West, however, the consolidated ear, Couty de la Pommerais, can you at lawyers, women professors, principals, and eruptive mud of the mines was believed by this moment thrice lower the lid of your some to be the true matrix of the diaomond; right eye while the left remains open?' The To be sure, it is not necessary that art and but opinious differed on the question, and next day, when the great surgeon reached grace should take their flight when crudition arguments were found on both sides. M. the condemned cell, he found the doomed steps in. Our professors are not all prudes, Chaper, a French geologist, has, however, man practising the sign agreed upon. A nor our doctors all dogmatic. The hard-during a scientific mission to Hindustan, few moments, later the guillotine had done featured and harsh-souled mouth pieces of succeeded in finding the diamond in its its work, the head was in Velpeau's hands, the shriller sex who deem it their stern duty mother rock. At Naizum, near Bellary, in and the question put. Familiar as he was to vindicate female equality with the male, the Madras Presidency, M. Chaper has found with the most shocking and ghastly scenes, are not the fairest types and samples of their | the diamond in a matrix of rose pegmatite, he was almost frozen with terror as he saw kind. The average man will always be found where it is associated with corundum. The the right lid fall, while the other eye looked susceptible to the attractions of feminine tract of country is almost denuded of trees, fixedly at him. Again!" he cried frantically. beauty and tenderness, however the posses- bare and rocky, and the rains wasting the The lids moved, but they did not part. It THE WITHDRAWAL OF THE SEA INTO THE EARTH'S INTERIOR.

There is good reason for believing, with all "isms," and to take all the degrees and distinct in line than the stones of South Hunt, that in the remote future of the earth diplomas, if she will only be pretty, and Africa, which seem to have been formed in the waters of the sea will be withdrawn into amiable, and modest, and sympathetic. Nor a freer matrix. It follows from M. Chaper's her interior. The process of withdrawal, is there the slightest affront or indignity in discovery that diamonds may be looked for adds Mr. R. A. Proctor in Good Words, is in first place, it is perfectly natural. We ad- erceion of pegmatite, for example in quart- cavern, such as Kent's Hole in Devousbire, mire most what we have not in ourselves; zites with or without mica, clays, pudding on the driest and hottest day, or even after roof wet with the waters which have been slowly making their way from the surface, Miffin does not sound like the name of a where they fell in the form of rain months characteristics of some crushingly clever man who would be likely to do anything before. Throughout the whole crust of the women have produced a certain feeling of very dreadful; nevertheless, a gentleman earth, except in a few spots where rain never is not to be wendered at that the latter than Miffin has invented a gun which, if time. Only a portion of the water, which are disposed to pay particular honour to only it answers the designer's hopes, will thus falls on the earth, ever returns to the women, who are not only elever enough to revolutionise modern warfare. Several years form of springs. Artesian wells show how be piquantes, but also gracious enough to be ago Mr. Miffin heard a naval officer remark slowly some of the strata of the earth permit Stephan attractive. In the earlier days, to which that if anyone could perfect a gun which water which has thus reached them to pass Tetuan reference has been made, this combination would fire, or, rather, which would throw, through; but they show also how large a Tentonia of learning with charm, was the sole condi- dynamite, a new sepect would be put on war, portion of the earth's waters are already Titan tion on which a poet or dramatist would and an aspect disastrous for the side that beneath the surface. . . It may well be that Twilight venture to introduce a learned woman to the was not thus armed. Mr. Miffin thought the amount actually withdrawn from the sea notice of his readers. Witness the femmes about it, and he promptly perceived the surface in this way, and not restored, does savantes and the précieuses of Molière, and difficulty. If the dynamite cartridge were not produce a change of level of more than the sweet girl graduates of Tennyson. Ridi- discharged with gunpowder the shock would a foot in a thousand years. Still even that culous they might be, and hapless, and explode the dynamite. This would be des- would involve a very important alteration in Kians doomed to condign punishment at the hands perately destructive, but only to those who the aspect of the earth in such periods of of their literary creators; but they were let it off, as the result would inevitably be to time as belong to a planet's history. A million nearly always good-looking and gracious, burst the gun. Mr. Miffin went on thinking years would reduce the sea level by a thou-An absolutely forbidding prodigy of female about it, and came to the conclusion that the send feet, and in a period of time, which erudition would not have been endured as a cartridge could be fired with compressed air. cannot be reckoned long when compared heroine of romance by our fastidious grand. On this principle the new gun is made. It with the vast periods of which the heavens parents.
